This edition of the conference comes amid significant global legislative developments in arbitration.

The United Kingdom has introduced significant amendments to its Arbitration Act of 1996, while France is preparing to enact a modern and independent arbitration statute. These developments underscore the need for Arab legislators to remain informed and engaged, to modernize national arbitration laws, enhancing their effectiveness, bolstering investor confidence, and reinforcing legal certainty.

In this context, the enforcement of arbitral awards emerges as a central theme for ensuring justice and the protection of rights. Nonetheless, practice reveals a range of challenges, particularly in the enforcement of awards against sovereign states, public entities, or limited liability companies.

Arbitration remains a vital tool for resolving commercial disputes with efficiency and flexibility. However, many Arab jurisdictions still suffer from legislative gaps and practical challenges that diminish investor confidence. The session explores the imperative of harmonizing procedural standards, strengthening guarantees of fairness and transparency, and promoting party autonomy in alignment with global best practices, thereby enhancing the region’s appeal as a credible seat for arbitration.

	5:15 PM – 7:15 PM	Session II: Challenges in the Enforcement of Arbitral Awards – Between Legal Texts and Practical Realities The enforceability of arbitral awards is a cornerstone of an effective arbitration regime. Despite the supportive framework of the 1958 New York Convention, many jurisdictions—including Arab states—continue to face hurdles related to public policy interpretations, judicial intervention, and procedural formalities. These challenges undermine trust among foreign investors and parties. This session aims to bridge the gap between legal frameworks and judicial practice while exploring practical strategies for overcoming enforcement obstacles.
